"CONSERVATIVES" ON WALKER. - The conservatives everywhere are down on Walker. Just at present those of New York are particularly down on him. The meeting in his behalf at the Tabernacle in that city a few evenings since has free an immense amount of virtuous indignation against him, and the end does not appear to be yet. Some of the philippics launched at his head have been elaborate as well as fierce, and not without a touch of philosophy. They are worthy of notice. Though differing in many respects, they agree perfectly in arraiguing Walker as a conspicuous violator of the right of every people or nation to govern itself, and in holding him up as such to the contempt and execration of mankind. This is certainly lofty ground of accusation, and valid, if pertinent. But has it any application to Walker? In our judgment it hasn't the slightest. These over-nice conservatives, who, by the way, are nearly all flaming Black Republicans, take for granted what they ought to prove. They beg the whole question in dispute. No American citizen, not even Walker himself, will controvert the right of any nation to frame its own institutions and choose its own rulers; but are the inhabitants of Nicaragua, whom Capt. Rynders at the meeting just menibed with more truth than e "half Indians, half negroes, and half bull-frogs," a NATION in any fair significance of the term? And, if they are, does Walker seek to obstruct or promote the exercise of their right to govern themselves? These are questions in point, questions ing a pledge from those who are to be most benewhich must be considered and determined before any sensible judgment of Walker can be rendered, but questions, alas, which our radical conservatives of Gotham find it more convenient to eschew than to settle They elude them altogether. This will never do. Since they have undertaken to try Walker in the high court of political ethics, let them go through with the prosecution fairly. Let

all those who employ it with the greatest airs. In the the author of the stolen poetry addressed to herself. first place, the population of Nicaragua is thoroughly ignorant and debased, and, however international policy may concede it the quality of nationality, it has really no more claim to be esteemed a nation than so many Camanches in New Mexico or so many negroes in Africa or so many chattering monkeys in Java. It is in that condition of barbarism which opposes no sound ethical of political objection to any foreign intervention whatever that guaranties order and development. States, indeed, may wrangle with each other respecting the propriety or extent of intervention in the affairs of such a people, but such a people themselves have no supreme right to be let alone. A nest of pirates or a society of lunatics or idiots might as well arrogate the right. They are not fit to govern themselves. They are utterly and palpably and scandalously incapable of selfgovernment. It would be culpable, and might be criminal, to entrust such a set of intolerable savages with their own destiny. Neither the law of nations nor the interest of nations nor any principle of hnmanity or justice requires it. It is the merest sentimentality to plead great principles of political right in favor of a population like this.

But, in the second place, Walker has not actually

proceeded in derogation of even the imaginary rights these yellow-legged vagabonds of Nicaragua. He went among them at their own pressing solicitation, united his destiny with their own, as he had a perfect right to do, espoused the liberal party in their government and maintained it again it very formida-

of the republic by the free suffrages of the people, and is now the head of the de facto government of the country, lavishing his energies and periling his life to defend and redeem it. This is his offense. And this is the whole of it. We submit that our fanatical conservatives are attempting to make a monntain out of a very insignificant mole-hill. They either misconceive the entire question, or willfully misrepresent it. We certainly regard it quite differently. We say nothing of Walker's present prospects, for we know nothing of them, but we do say that his cause, so far from contravening the fundamental principle of republican governments, is directly and vitally in the interest of that glorious principle, and involves especially the welfare and prosperity of the miserable people whom it especially concerns. He has our best wishes, and, we think, should have the best wishes of every true and enlightened conservative.

MEXICO. -One of the New York Herald's Washington correspondents has discovered a novel and somewhat startling feature in our Mexican rela tions. According to this enterprising quad nunc, Comonfort has made a formal proposition of alllance to the administration at Washington, in the interest of which a brisk correspondence between the two governments is now progressing, with a fair prospect of ending in astonishing results. The Herald itself, taking the one from its correspondent, chnckles over the assumed revelution with characteristic gusto, and pronounces it not only highly probable, but exactly the thing.

We are not by any means so confident either of its certainty or its propriety. Indeed, we are strongly disposed to regard the whole thing as a mare's nest. It is true, as the Herald says, that the idea of a military government in Mexico with an American officer at its head is neither altogether new nor obnoxious to a portion of the Mexican people, but it is quite incredible that any serious thought of an intimate political alliance between the Mexican government and our own could have entered the mind of anybody. Such an alliance would be contrary to our time-honored and established policy, in defiance of every principle of statesmanship, and against the manifest interests of both countries at home and abroad. It would be particularly against the interests of our own country. Its only present effect would be to inflame the jealousy of foreign powers, already far too active, and still further aggravate our domestic dissensions, already much too angry. Its future consequences might be yet more serious: We could not afford to lash ourselves to such a dead body as Mexico is. The union would be monstrous and fatal. The mean level between the two conntries, towards which both would inevitably gravitate, would sink us out of sight of our cherished destiny without lifting Mexico perceptibly above her present status. The notion of subjecting this proud young republic to so degrading and ignoble and every way pernicious an alliance is of conrse

out of the question. Probably the only real egg in the Herald's mare's nest, if it has any, is the project of some friendly treaty or other between the Mexican government and our own. The Herald has raised as loud a cry over as little wool before.

U. S. AGRICULTURAL SOCIETY.—The committees appointed to secure pledges of the sum of money to nsure the Society to hold its next fair here, will, in the discharge of their duty, call upon the citizens early this week. We hope that they will meet with a prompt and liberal response, and that the amount will be made up without delay, as the result must be reported at the meeting at Washington on the 14th inst. There is no risk in giving the pledge, and there ought to be no delay in making up the sum. The large concourse of people brought together by this National Society is a sure guarantee that it will not only pay its own expenses and premiums, but bring large sums of money to be expended in the city. They do right, however, in requiry fited by the fair.

A city paper, of yesterday, noticing the stolen poetry in the Journal of Thursday, says:

THE VARIETIES.

THE CALIFORNIA GOLD HARVEST .- During the ear 1855, there was received in New York, by Calfornia steamers, \$41,682,524 in California gold. During the year 1856 the receipts have amounted to \$40,319,929, being a decrease from the amount received in 1855 of only \$1,362,595.

Odd Fellowship .- There are in the United States 3,397 Odd Fellows' Lodges, comprising 193,614 members. Nearly half a million of dollars have been expended by them during the last fiscal year for the relief of members and widows and orphans. Their total receipts during that time were \$1,180,325. The encampment numbers 23,749 members and has expended during the year \$30,693 in charities out of \$102,868 total receipts.

Crossing the Mississippi .- A bridge is now being onilt across the Upper Mississippi, at St. Paul, Minnesota. It is to be 1,300 feet in length, resting upon nine piers—the highest of which are seventy eet above high water mark, so as to allow the largest boats to pass under without difficulty. The greatest span will be two hundred and twenty feet; sufficiently wide to allow the largest rafts to pas without coming in contact with the abutments. The whole cost of the work will be near \$120,000.

American Seamen .- We have received from the Department of State, Washington City, an abstract of the returns of American seamen, registered in the several ports of entry in the United States during the year ending Sept. 30, 1856, of which the following is a recapitulation;

Most of the towns north of us have been visited with snow, and shovelling off the sidewalks has become a serious business. Paths for gentlemen are soon opened, but in some of the larger towns they are talking of special appropriations for shevelling them out wide enough to admit the free passage of ladies with hooped skirts, and with switching off places at intervals, so that, when two skirts happen to meet, they can pass.

The boot, shoe, and leather trade of the city of Boston has subscribed the sum of \$20,000 to the stock of the New England Emigrant Aid Company. to the challenge sent him by Air. Stephene:

I regard duelling as no evidence of courage—no vindication of truth, and no text of the character of a true gentleman. I shall be "braggart, liar, poltroon" enough, now and forever, to declare that what the laws of God and my native State united u denouncing as murder, could give me uo satisfaction to do, to attempt, or to desire. The determination is but strengthened, when the contrary course involves the violation of my conscience and the hazard of my family as against a man who has neither conscience nor family. But I have had and shall continue to have courage enough to do my duty firmly and truthfully, and to defend myself anywhere, even in the Eighth District, and if any gentleman doubt it, there is a short and easy way to test it.

How the People of New York Died Last YEAR.-New York, although increasing in population, decreases in sickness and death, as illustrated by the mortality reports of the last year. We see that the total number of deaths the past year was 21,263, being about 1,000 less than in 1855, and 6,000 less than 1854. Consumption, as usual, carried off the largest number, its victims reaching 2,432. Fevers of various kinds proved fatal to 2,020; inflammation to 1,878; convulsions to 1,489; and marsamus to 1,422; 1,535 were still-born; dropsy included 1,135 in its catalogue. Of those who died, 15,996 were natives of the United States: 5,133 foreigners; 430 colored, and 134 unknown.

EMIGRATION .- The Statistics of Emigration, for the past year, have been made by the New York Herald. The general result displayed by the figures is that the tide of emigration, which was checked by the Russian war, is again setting strongly for our shores, with the prospect that this year an enormous acquisition will be made to our population through the medium of the emigrant ships. It is thought that the emigration may this year be as great as in 1854, when it reached 319,228. In 1853 tal, ,092 66 ,035 259 878 704 66 338 41 it fell off to 136,233, and during 1856 run up to 141,-915, two-thirds of which has come within the past seven months.

FROM FLORIDA .- A correspondent of the Savannah Georgian, writing from Key West, under date of the 25th ult., states that although the flags of truce, inviting a conference, ordered by Gen. Harney, had been displayed from all the military posts and other public stations, the Indians had taken no friendly notice of them and those along the "Indian track" had even been torn down by the savages. This is supposed to indicate their determination to hold no intercourse with Gen. Harney.

Kentneky is the most gallant and chivalric of States. Here alone in this country or the world is the right of suffrage expressly conceded to woman. By the Revised Statute any widow having a child between the age of six and eighteen years may vote for school trustee. Navigation is more effectually closed than it has been yet this season. The thermometer on Saturday morning stood at 10 degrees above zero and yesterday it was fully as cold if not colder. Some of the boats in the gorge at Six-Mile Island will be in a perilous condition when the ice breaks np. The Snperior lies broadside in the gorge, and the Gen. Pike, North Star, and the two barges of the Memphis lie in pretty much the same condition. We understand that Capt, Fnller, of the Gen. Pike, has entered a protest. The river is very low and falling, and there are no more than 31/4 to 4 feet water on the flats. The river fell a foot at Portland from Saturday till yesterday morning, and several boats advertised have laid up in consequence, among them the Fanny Bullit and Virginia. There were three arrivals from below yesterday, all small boats. It is donbtful whether any large boats come up on the present stage of water.

for a grant of public lands, to be donated to a company to be chartered by the States bordering on the Ohio river, have been forwared to the Cities of Baltimore, Philadelphia, New York, New Orleans, St. Louis, Louisville, Cincinnati, and Wheeling, soliciting their cooperation. The proceeds of these lands are to be expended in the improvement of the Ohio, according to a plan which may be recommended by a commission of engineers, and approved by the President of the United States.

We learn from the Nashville Whig that the teamers Ambassador and Nashville came in collision on Wednesday in the chute at the head of Bald Island. The bows of both boats were more or less injured, but no serious damage was done to either.

THE SUFFERING POOR-RAILROADS AND FUEL. The majority of our readers comfortably housed as they are, have no adequate idea of the amount of suffering existing among the poor of this city. We believe it is greater the present winter than during any previous one. This must be the case from the fact that there has been for so long a period a general prostration of our mercantile and manufacturing interests. We had a dull summer and an autumn in which onr trade suffered severely from low water. Consequently, when the winter set in, there were few amply provided for its rigor and hardships. Not only have the real poor been obliged to want for the necessaries of life, but the families of respectable and hardworking mechanics have been forced to economise almost beyond the powers of endurance. The lack of fuel, and the enormous price at which

it has been selling, has been the most grievous evil from which the poor have had to suffer. Pittsburg coal is now selling at fifty cents per bushel, and the river is frozen. For the most diminutive loads of wood the most fabulous charges are made. Yet there are thousands of acres of woods upon the lines of both of our railroads, only a few miles from the city, which onght to be brought to market at a very small cost, and thus greatly ameliorate the condition of the suffering poor. But the Lexington company, we understand, refuses to bring in wood, and the LOUISLANA SUGAR CROP .-- A correspondent of the Nashville road charges such a high tariff that it could not be brought here. We regret that such is the policy of the management of these roads. They were both constructed, mainly by the subscriptions of the peoples money. The object of their construction was the benefit of our citizens. Now when there is a pressing demand for their services, they ungrate-Necessity knows no Sabbath, or day of rest, fully refuse them. If justice to Louisville did not londly and rightfully demand some other more liberal course of action, the cries of the poor, and the voice of philanthropy should dictate to these Directors the wisdom and humanity of doing all in their power for the relief of our necessities.

> IN CHANCERY .- ABOUT DIVORCES .- We have been in chancery, but not thank Heaven, as a liticant-merely to seek information. Since we first read Bleak House and became mentally entangled in the meshes of the interminable Jarndyce vs. Jarndyce case, we have had the utmost horror of all things pertaining to chancery, from the Chancellor who issues decrees to the boy who sweeps out the dusty, dirty, begrimed and cobwebbed court room. What we ascertained during our brief visit to the Chancery Court, was that during the year just closed there had been decided cases embraced from the number 11,501 to 12,470, making a total of seven hundred and sixty-nine (769). This is quite a large amount of business, and is the best testimonial possible to the diligence and faithfulness of the able gentlemen who have presided over that Conrt. Chancellor Logan is now working with great zeal to keep up with the docket.

> Among the most interesting cases decided were those granting divorces between husbands and wives. There were sixty of this description during the year. All kinds of reasons for asking separation were given. and some of them so amusing and trivial that it would scarcely seem possible how plighted love could be thus easily trifled with and destroyed beyond the hope of reparation. Singularly enough in nearly one-half the cases the husband was the complainant, alleging all manner of charges against the queen his heart. We fear that the courts of law contain many facts demonstrating how woman is

It is not sufficiently impressed on the public mind that the entire Pacific coast within the boundaries of the United States compares in winter with the same latitudes of Europe, and contrasts remarkably with the Atlantic coast. Not only the extreme limit at the 49th parallel is warmer than Washington for the winter, but a distance like that from Paris to Aberdeen must be passed over beyond our ex treme limit at the north of Puget's Sound to find a winter as cold as that of Washington. The winter at Paget's Sound is warmer than that at Paris, the mean being 391/2 degrees at the first and 38 at Paris; and the winter at Sitka is warmer than that of Washington (361/2 and 36 degrees respectively), notwithstanding they differ 13 degrees of latitude, or meanly 1,250 miles, in position on the meridians.

Commodore Stewart, who has been in command of the navy-yard at Philadelphia, finding that his time was about to expire, notified the Secretary of the Mayy, that, in accordance with usage, he asked the appointment of his successor. Mr. Dobbin at once replied, with generous acknowledgment of the great services of the gallant veteran, that no ordimary rule should be applied to him, and it was not only the pleasure but the wish of the Department that he should retain the position, so long as it was acceptable, and that he would not be disturbed until as duty became an incumbrance. He now retains his place as senior captain in the navy on duty, and with the highest pay allowed by law-\$4,500 a year.

A short time ago, an American gentleman of the name of Cunningham was killed in a street row at Foochow, in China, and, in consequence of what seems not an unreasonable demand for satisfaction not being complied with, the American Consul (Calch Jones, Esq.) has taken upon himself to stop the duties payable to the Chinese Government by his countrymen.

A strong combination, it is stated in the Baltinore American, has been formed to obtain a repeal of the duty on railroad iron, and refund the money paid within a limited time not designated. Five per cent. is named as the rate of allowance on this scheme, applying to the aggregate of refunded and remitted duties. A committee from New York is new stationed at Washington, and the basis of the project rests upon the supposed favor of the united South, together with cooperating influences from the Northwestern and Eastern States.

Corns. - The best care for these troublesome things that we have ever tried is to soak the feet in hot water for a quarter of an hour, so that the corn may become soft, and then trim it off as close as pos may become soft, and then trim it off as close as possible, and not cause pain. Then take the tineture of the Arbor Vitæ placed upon a little cotton and apply to the corn, and after a few applications the corn will not only disappear entirely but will not be likely to return again.—Scientific American.

A Sentiment-The Ladies .- May their virtue e ceed even the magnitude of their skirts, and the faults be still smaller than their bonnets.

A very singular circumstance has resulted from the destruction of Christ's church, Montreal. Mr. Warren, for many years the organist, became so depressed by the destruction of his favorite instrument that he died suddenly on Friday morning. He had been previously in apparently good health.

The Norfolk (Va.) While a select party at a Boston hotel, the other night, were drinking wine at \$20 a bottle, on the next street the police found two families half starved and half frozen -a contrast of civilized life.

BOSTON AS A MART .- The following figures taken from the last report of the Board of Trade show the value of some of the leading manufactures that find a market in Boston:-Manufactures of cotton \$47,000,000; boots and shoes, \$37,500,000; wooler goods \$22,000,000; clothing, \$12,000,000; leather, \$9,000,000; books, \$5,500,000; furniture, \$4,500,000; agricultural tools, \$2,500,000-Total \$140,000,000

In the immediate vicinity of Boston, there are manufactures to the extent of at least \$150,000,000 annually, and of this the value added to the raw material by labor cannot be less than \$70,000,000. In addition, the foreign dry-goods, groccries, drugs, hardware, and a multiplicity of other articles sold there swell the trade of Boston to nearly or quite a hundred millions more. Of manufactures the first in importance are domestic cottons, and of about fifty millions manufactured annually they send to foreign countries less than two millions, or four per cent. One-half of these go to the west coast of South America, the east coast of South America; and the Central American States, while the West Indies receive less than \$220,000 worth of cotton manufactures from Boston in a year. The trade of Boston with Cuba for the fiscal year ending June 30, 1856, stood as follows: Value of imports, \$3,683,256; exports, \$1,044,359. When shall we have the statistics of Louisville manufactures and trade as complete as the Bostonians can so readily furnish them! There is a great lack of the true enterprise here to properly make known the real importance of this mart.

AN EFFECTUAL MODE OF STOPPING A RAILROAD TRAIN .- It sometimes happens, in thick stormy weather, that the engineer of a train cannot clearly see but a very short distance ahead of his engine, and is liable, therefore, to overlook a flagman that may be sent back to warn him of danger ahead. It is stated that this was the cause of the late collision of a passenger and freight train upon the Boston and Worcester railroad. To meet any such case a novel method of warning the engineer has been placed in the hands of a person upon each train of that road. It is in the form of a small tin box, so fitted as to be confined to the rail. If the engineer should not notice the signs of the flagman and check his train, one of these boxes, which are filled with an explosive material, is placed upon the rail. As soon as a wheel of the engine strikes it, it immediately explodes, and this gives effectual warning to those

THOS, H. LARKIN & CO.'S ANNUAL CIRCULAR

Thos, H. Lakking Co.: Sangal Chechian.

Sr. Louis, Dec. 24, 1856.

Hemp—The re reliefs this year are about 7,200 tons less than in 1855. Stock intended, 1850 tales, against 7,308 bales at this date last season, and its value fully twenty dollars if ton higher.

We quote cash prices to. day at from \$150@155 2 ton for undreased; \$200@3210 25 to 100 25 ton for brake took to manufactured, 190@ 100 25 ton for brake town, 90@100 25 ton to bagging, demand almost wholly limited to how manufactured, and holders confident of closing out befor. The crop of Missouri will probably be one-fourth larger than last season, and of very superior quality; the yield of Kentucky is reported a full average and staple good; the

cotton crop will not exceed three millions of bales; stocks of bale rope nonsually heavy with probability of hoop-iron being substituted to some extent; demand for cordage purposes quite limited and large shipments of gunny cloth known to be on the war; and taking into consideration the most important items connected with American hemp, we believe prices here will range from \$126,68135 % ton during the spring.

Receipts of bale rope 54,218 coits, against 20,000 coils last season. Hemp seed scarce and worth \$1.37 husbel.

The New York Tribune furnishes the statistics of the cattle trade for the year 1856. The total number of bogs received were 345,911. Of this number 140,626 were received from 5th of November to 31st of Dec, The bi of the year is summed up as follows:

If we estimate the beeves at an average of 700 lb. net, it will give a total of 180,539,900 lb. of beef, which, at an average of 9c. 3 lb., would be \$63 a head for the bullocks, a total of \$11,764,591 paid the country in one year for beef

cattle.

If we estimate the calves to average 150 h, live weight, it will make 6,493,156 h., and this, at 5c. average 29 h., will make 6,223,107 50 paid for calves.

The sheep we estimate at 45 hs., net average, which will give 20,623,285 hs. of muiton. At an average of 33 50 a head for sheep, they come to 31,625,83.

We think it safe to estimate the net weight of swine at 125 hs of pork each, which will give a total of 43,28,335 hs., which, at 8c. a h, or 316 29 hos; is 33,455,110.

As the cown all pass into beef in process of time, these must be added to the general stock of butchers' meat, and estimating them to average 500 hs-, net, we have 6,423,500 hs-, of beef. At an average of \$25 ahead the cows come to 448,005.

\$489,895.

The sum total of this is that the city has paid the country for animals slaughtered in the sity in the year 1856, the sum of \$17.635,834, and the estimated product is 20,7850,180 fb.c of meat. This, at an average of loc a fit to the consumer, makes \$30,785,018, and gives 599,504 54-73 fbs., per day, which may be set down as something over half a fb a day for every man, woman, and child in and about the city.

ANNUAL REVIEW OF THE TOBACCO TRADE OF BALTIMORE,

ANNUAL REVIEW OF THE TOBACCO TRADE OF RATTMORE.

The Tobacco market this year, throughout the whole country, has ruled at unusually high rates. The demand throughout the year not only swept off all the stork remaining from the previous year, but great compelition prevailed among huyers, and the end of each week found the market almost entirely cleared of the receipts. This state of things continued to the present time, and the year closes with no stocks of any amount in the hands of commission agents. There is still a demand, the orders from Europe not being filled, and hut little progress made in the fulfilment of the French contract, so that there is un doubt the market will open at high prices in the spring, and that the first receipts will be eagerly taken out of market. Tobacco planters, in packing their crope, will do well to use more than ordinary care in handling their Tobacco, so as to make the quality in each hogshead as even as possible. This precaution will be amply compensated for in the increased price which the well assorted article will bring.

The crop of Maryland Tobacco, which has just been gathered, is thought to be an average one, and generally of good quality. In some portions of the Tobacco growing counties there is a falling off in the quantity ordinarily produced, but the yield on the whole will be about as large as usual. We hazard little in predicting that prices this year will be quite remunerative to the planter, and we doubt not unusual efforts will be made during the coming springs oset out larger crops than were ever before raised in the State. It is to be hoped that the planters will make free use of guano in the preparation of their lands, and increase the produce of this important staple of Maryland, which annually draws from abroad such large pecuniary returns.

Ohio Tobacco.—Baltimore is the chief, indeed we may say the sole, market for Ohio Tobacco. The average crop of Ohio in torner years was about 16,000 hogsheads. The crop seut to market in 1858 was 18,000 hogsheads in 1

Manufactured Tobacco.—The operations in this article during the year just closed have been much larger than for many years previous, caused by the very large production of leaf in 1855, together with the extraordinary high prices which have ruled for the last six months. We now find the raw material and the manufactured article dearer than they bave been for fifteen years; indeed the extreme prices of 1859 were not so high as they now are, while the stock on hand is several thousand boxes short in this market alone, as will be seen from the statement below. We, therefore, do not look for much lower prices for some time to come, unless there should be an immense crop raised throughout the country next year.

GREAT EXCITEMENT .- Ninety-six Third street is crowded from morning till night. Everybody seems intent on buying Porter's Oriental Life Liniment; everybody uses k, and everybody likes it and tells their neighbors about it; consequently the demand is tremendous and constantly increasing. Besides the large amount sold at wholesale to the trade, the retail sales at the principal depot average 300 bottles per day. A whole ream of paper would not contain all the certificates that are voluntarily offered in its favor. For the cure of froetbites, chilblains, and chapped hands it is considered unparalleled by those who have d30 d&wj&btf

FANCY AND STAPLE DRY GOODS .- We would respectfully invite the attention of persons, especially ladies, to our stock of black fancy Silks, Embroidered Crape Robes, Illusion Robes for evening, Plaid Cashmere, D'Laines, Merinos, Velvet and Cloth Cloaks, Shawls, Embroideries and Lace Goods, a large stock, which we are offering very low. We have a large stock of Welsh, Ballardvale, and Shaker Flannel, Linen Table Damasks, Napkins, Towels, Irish Linens, bleached Sheetings, bleached Cottons, best brands, which we are offering as low as they can be found in this or any other Western malet.

THE PEAK FAMILY .- ODD FELLOW'S HALL .- The celebrated artists composing this troupe are to favor our public with one of their musical entertainments to-night at Odd Fellow's Hall. They are enthusiastically received wherever they visit, and we apprehend that they will not lack for appreciation in this city, so famous for its taste in matters of music.

Their music with the bells is spoken of by the press as unequaled; while the vocalization and difficult harp playing by Miss Julia and her brother is very superior.

Without blindly believing all the projects that science and industry hatch in the human brain, we like to encourage them and do our best to give them publicity. In all new projects, although we have not much counfeture in them, there is always something neeful and profitable to be extracted, and it is for this reason we make known the tides connected by Mr. West, a clvil engineer of Prescott, C. W., and laid before the Chamber of Commerce by him. It does is to connect Teronto with Georgian Bay by railroad. Nothing very strange in that, you will say—but the extraordinary part is not yet told. The project is to transport the vessels from Lake Outario over the railroad to the Bay, from which they can easily pass to Lake Huron. At first the design seemed so Irrational that the members of the Chamber of Commerce could only laugh at it, but Mr. West remained unmoved by their ridicule, and explained his plane and means of operation with so much ability that his anditors were finally convinced of the feasibility of its application, and begged of the inventor to mature his project, and at the same time tendered him a unanimous vote of thanks.

WASHINGTON, Jan. 4.

The wife of Judge Daniels, of the U. S. Supreme Court, was burned to death last night by an accident at the residence of her husband, in Franklin Row. The Judge and his wife had been out, and on returning home he went into the library and she repaired to her sleeping apartment and commenced disrobing preparatory to retiring for the night. Being very near-sighted she did not perceive a candle sitting on the hearth nor the flames that communicated to her clothing until they completely enveloped her.

Fletcher's fell last night was 20 degrees. At 11 o'clock to-day it stood at 31.

The Abasket of marketing, consisting of turkeys, ducks, etc., was left through mistake at Mr. Hartwell's residence. If not called for soon will be sent to the orphans.

MORE NEGRO EXCITEMENTS .- The Memphis Appeal, of last Tuesday, has the following:

We learn that considerable excitement was ated in St. Francis county, Ark., on Wednesday last, by rumors of a rising of the negroes in St. Francis county, on Christmas day. A slave belonging to Mr. Allen, a planter residing near Madison, informed his master on Tuesday last that it was the intention of the slaves to rise on Christmas night, march to Madison, murder the whites, and burn the town After that was accomplished they were to match on the town of Wittsburg, and share the same fate. Three negroes, implicated as ringleaders, were arrested, and after being whipped, told the same tale as the slave of Mr. Allen. Five slaves were in chains on Friday last. Considerable excitoment was created throughout the county, and vigilance com mittees have been appointed.

The Napoleonville (La.) Pioneer says:

On Friday last, a white man and a negro were arrested in our village, and lodged in jail. The negro says he belongs to the Hon. Marcel Ducros, living below New Orleans, and that the man with whom he was arrested had promised to take him into a free State, and there set him free.

State, and there set him free.

The negre boy John, belonging to Mr. F. Robichaux of this parish, accused of participating in an insurrection said to be preparing among the blacks of this parish, was tried on Friday last, and sentenced to two month's imprisonment in the parish jail, and during the time of his imprisonment to receive three handred and fifty lashes: afterwards to wear iron for the space of two years.

The Pioneer says the report that two Englishmes and a German, all school teachers, have been arrested for leing implicated in the negro conspiracy in Assumption parish, is untrue. No white men have been arrested for being implicated in the affair.

FROM THE RIO GRANDE.-We have copies of the Brownsville Flag, of the 10th ult., from which we extract the following interesting items:

. More Trouble.—We are informed that files of a new pronunciamento have been discovered in Matamoras. It is said that Col. Garcia has made this discovery among some of the officers who accompanied him on his late expedition against Vidaurri. They are said to have been tampering with their men for the popular cry of "Religion y Fuerros," and it is thought the clergy are backing them with council and money. Col. Garcia has, we learn,

taken prompt measures to suppress the movement.

Death of Maj. Hagner.—Maj. Hagner, paymaster for the U. S. army for this military district, breathed his last at Fort Brown on Saturday last, 6th inst.

NEGRO INSURRECTION.—The following is a dis patch to the New Orleans Picayune:

Mobile, Dec. 27.—A dispatch from Selma states that a negro insurrection has been discovered in Sumter, Marion, and Perry counties; that one hundred negroes have been arrested; that one white man was engaged in the insurrection; and that great excitement prevails in consequence.

CANNEL COAL ON THE PACIFIC ROAD .- The Lexington (Mo.) Express says:

We were shown a specimen of cannel coal re-cently discovered in Johnson county. The bank from which the specimen was taken, is on a fifty acre tract of land, lying about ten miles east of Warrensburg, belonging to Mr. Craig Graham. The bed is hree feet deep, and on the survey of the Pacific railroad.

CRUELTY TO ANIMALS .- We daily witness upon the streets of our city the most provoking cruelty to animals, especially to that noblest and most useful of all, the horse. In many instances this con duct is altogether unintentional, but results from careless indifference. This does not render it the less criminal. During the last week the poor horses have suffered dreadfully. They have been compelled to draw overloaded drays and wagons over streets and wharves upon which they slipped and stumbled. They have been out in the coldest weather, unprotected by any covering when at a stand-still, and shivering in every limb from the intensity of the cold. We notice indeed the horses of many of our physicians and wealthy citizens being driven about covered with icy sleet, and manifesting every sign of distress.

ETHER HER KNOWN L

We do not see how noble and kind-hearted men can thus tolerate such abuses and we trust that this word of ours in behalf the horse may lighton his loads and cover his back.

To the Editors of the Louisville Journal:

GENTLEMEN: The editor of the Courier is undoubtedly a very pretty chap to talk about the stealing of a piece of poetry by some anonymous personage. I wonder if he supposes that hundreds in this city do not know that the greater part of his leading editorial articles for months past (yes and for yearstoo) have been stolen word for word? Is he not sware of its being perfectly motorious that there is not a thief in the workhouse who has lived more exclusively by theft than he has? Has he never heard of the very current remark that if any daheard of the very current remark that if any da-guerrectypist should propose to take the likeness of the editor of the Conrier, a pair of reissors might appropriately do the sitting?

If he wants to know who says these things, let

The following publication has been ordered to made by the Masonic Board of Finance:

Whereas, a report has been circulates, rom some quarter that the Masonic Board of Finance bave falled to pay Mr. Luther Wilson, according to agreement, for plastering the Masonic Emple and thorethy caused the delay that has occurred in completing the building, the Board in self-defence and as a duty which it owes to the Masonic Fraternity and a generous public that have encouraged and sustained them, offer the following statement of affairs between the Board and Mr. L. Wilson:

a generous public that have encouraged and sustained them, offer the following statement of affairs between the Board and Mr. L. Wilson:

The proposition of Mr. Wilson, which was accepted by this Board, was to plaster the entire huilding inside and out, including all ornamental work according to the plans and specifications of the architect (E. E. Williams) for the sum of \$8,590, to which was afterwards added the coloring of the ontside plastering, which he agreed to do at 12% centagery and, and which amounted to \$361 28, making a total of \$9,311 26, to be paid in the following manner, viz: \$3,500 cash, at the rate of \$125 per week during the progress of the work, and the balance, if any, on completion, to which was to be added the proportional part of cash for the coloring, making the cash \$2,540. The balance, \$6,571 25, to be settled as follows, viz: \$900 in stock of the Temple, and \$4,771 25 in notes of the Fraterinty, commercing to fail due at eix months from the 1st of July, 1856, and ranging to two years after the completion of the job. We will now proceed to show what has been paid Mr. Wilson (it being known that the work is not nearly completed). When Mr. Thurman enjoined the Board from paying Mr. Wilson any more money, they had paid him in cash \$5,000 and in short notes \$1,766 81, in all \$6,986 81, showing that the Board had having manifested any disposition to interfere with or withhold from Mr. Wilson any money that was due him, they had continued to pay him, from \$200 to amount of his contract rather than see the huilding stop, although at a very great inconvenience to the Board.

By order of the Board.

[Special Despatch to the New York Times.] WASHINGTON, Dec. 31.

Information has been received here that Hon. Isaac E. Morse, the special minister of the United States to Bogota, examined the islands in the Bay of Panama, on the 18th of December, in company with Consul A. B. Corwine and Commodore Mervine. It will be remembered that Mr. Morse's in-structions direct him to negotiate with the Government of New Granada for the cession to the United States of municipal control over certain of these islands, as well as over the transit route.

Mr. M. does not conceal the fact that the United

States Government looks to the early establishment of a naval depot in the Bay of Panama. He also admits the substantial accuracy of the statement made by the Times, some weeks ago, in relation to the demands he is to make of the Government at

It was M1. M.'s opinion when he left Panama that he would close his business up with the government of New Granada within six weeks—an expectation which did not raise his judgment in the estimation of those who are familiar with the temporizing, procras-tinating habits of the people with whom he has to

The President sent to the Senate last year an Extradition Treaty with the government of Netherlands, which had been negotiated by August Belmonte. The convention doubtless was originally drawn in the Dutch language; but Belmonte's translation of it turns out to be neither Dutch, English, anguage is found so shockingly bad and uncertain that the Committee on Foreign Relations will not

report it for confirmation.

The President, who did not discover the incoherence and illegibility of the document before he sent it to the Senate, is now so ashumed of it that he de sires to withdraw it, which he will probably be permitted to do. It is to be hoped, that, under the next administration, our representatives abroad will, at least, be sufficiently conversant with the language of their own country to be able to put a simple treaty into intelligible shape.
